## EXPERTISE

- Frontend Development:** Proficient in HTML, CSS, JavaScript, and modern frameworks such as React, Redux, and NextJS. Experienced in various styling techniques, including CSS Modules, CSS-in-JS, SASS/SCSS, LESS, BEM, Atomic CSS, and Utility-First CSS.
- Backend Integration:** Familiar with Firebase and headless CMS platforms like Storyblok and Contentful. Currently learning Node.js, Express and MongoDB to enhance backend capabilities.
- Testing and Performance:** Experience with Vitest, React Testing Library and Jest.
- UI/UX Design:** Strong ability to translate Figma and Sketch designs into fully responsive and interactive user interfaces, ensuring consistency across devices.
- Agile Methodologies:** Proficient in agile project management tools and practices, including Jira for sprint planning and Kanban boards.
- Collaboration and Communication:** Effective in cross-functional team environments, engaging with backend developers, project managers, QA testers, designers, and clients to deliver high-quality solutions.

## WORK EXPERIENCE

### React Developer

Apptension - Poznań, Poland

March 2022 - April 2024

- Specialized in frontend development for web and mobile applications, ensuring high-quality and responsive user interfaces using React, React Native and Next.js.
- Utilized various styling techniques, including CSS-in-JS, CSS Modules to create maintainable and scalable styles.
- Implemented frontend testing with Vitest, React Testing Library and Jest to ensure robustness and reliability of applications.
- Applied agile methodologies in project execution, actively participating in daily stand-ups, sprint planning, retrospectives, and client meetings.
- Managed project workflows using Jira, including sprint planning and maintaining Kanban boards.
- Contributed to project cost estimations and maintained code repositories on Bitbucket.
- Translated Figma designs into fully responsive websites and applications.
- Used headless CMS platforms like Storyblok and Contentful for backend management.
- Engaged in client communication, gathering requirements, providing progress updates, and incorporating feedback throughout the development process.

### Frontend Developer

Cambridge Audio - London, UK

March 2018 - February 2022

- Built interfaces for audio equipment using React and Redux, ensuring seamless user interaction.
- Spearheaded the development of new features and maintained existing functionalities across multiple websites using Drupal 8.
- Leveraged HTML, CSS, JavaScript, and the Twig templating engine to create visually appealing and interactive user interfaces, adhering to best practices and standards.
- Collaborated closely with the marketing team to understand requirements and develop necessary tools and features to enhance website functionality and user experience.
- Translated Sketch designs into fully responsive websites, ensuring consistency and fidelity across different devices and screen sizes.
- Optimized websites for maximum speed and scalability, employing techniques such as image optimization, code minification, and caching strategies.
- Developed reusable code components to streamline development processes and facilitate future enhancements and iterations.

### Web Developer

Freelance - London, UK

January 2017 - present

- Designed and developed websites from concept to completion, leveraging Next.js and a blend of creative design skills and technical expertise to deliver tailored solutions for client requirements.
- Collaborated effectively with backend developers to ensure seamless integration of frontend designs with backend functionalities.
- Maintained a strong focus on usability, accessibility, and user experience, implementing industry best practices to enhance website performance and user engagement.
- Utilized expertise in frontend technologies such as HTML, CSS, JavaScript, and responsive design frameworks to craft visually appealing and functional websites that consistently meet client expectations.
